

K2 SKATES

SPRING/SUMMER 2018

K2

PART OF MY EVERY DAY

Every day is better with skating. This has been our philosophy since 1993. As an industry leader our mission is to be at the forefront of innovation, comfort and quality. We continue to push boundaries, seek performance and creating the ultimate skating experience.

K2

TRIO 100 BLACK BLUE

Speed. Stability. Versatility.

Hitting the Trifecta. Our new, innovative, high-performance 3-wheel, premium skate. With a supportive yet breathable upper, UFS compatibility and optional rocker, this skate delivers stability and speed as your all encompassing skate for fitness, freeride fun and cruising. We are stoked on the TRIO.

K2

LIFESTYLE

Defying Stereotypes.

The K2 Lifestyle models go against the grain to defy stereotypes and categories. These skates are crafted for their versatility of use, a higher level of performance and designed with style. Whether you're commuting to work or cruising the trails, now you can match your skates with your lifestyle, your day and how you want to skate.

THE ORIGINAL® SOFTBOOT

A Foundation of Success

In 1993, we introduced the world's first SoftBoot® skate – forever changing the way performance skates are designed and built. Our Original SoftBoot® technology leads the market, providing the highest performance and most versatile inline skates. Our original SoftBoot® technology has since become an industry standard and continues to set K2 apart from the competition. After 24 years of building premium skate products, K2 is a brand cemented as an industry leader, with a reputation for defying the status quo - proving that experience matters.

K2 THE ORIGINAL

BOA FIT TO GO FURTHER.

K2 LIFESTYLE

Built for versatility.

These are not your ordinary inline skates. Much like our Ambassadors, the K2 Lifestyle line-up goes against the grain, defying stereotypes and refusing to be categorized. The TRIO, Broadway, SODO and Uptown are maneuverable, well balanced and versatile while having their own personality and style. Whether it's commuting to work, cruising the trails, or out for another blade night, there is a skate for everyone.

WHEELS

ACTIVE FORMULA

Our Active formula wheels feature an 80A hardness that is proven to provide a smooth and stable ride ideal for fitness and recreational skaters alike.

ACTIVE
72MM/80 A
4-PACK or 8 PACK*

* Includes ILO-5 bearings and ALU spacers.

ACTIVE
76MM/80 A
4-PACK or 8 PACK*

* Includes ILO-5 bearings and ALU spacers.

PERFORMANCE FORMULA

This 82A formula creates a durable, energetic wheel, with a lot of rebound, that delivers a smooth roll for high-end fitness performance.

PERFORMANCE
80MM/82 A
4-PACK or 8-PACK*

* Includes ILO-7 bearings and ALU spacers.

PERFORMANCE
84MM/82A
4-PACK or 8-PACK*

* Includes ILO-7 bearings and ALU spacers.

SPEED FORMULA

This 85A formula delivers a durable wheel engineered for achieving the highest of speeds. Speed formula is the choice for x-trainers, racers and speed junkies.

SPEED 90MM/85A
4-PACK or 8-PACK*

* Includes ILO-9 bearings and ALU spacers.

SPEED 100MM/85A
4-PACK

ELITE FORMULA

The Elite Formula is our premier wheel in our line up that is geared to be light-weight and fast. Despite having a race profile, the urethane mix that is used still provides plenty of grip and allows you to maintain your speed even over the roughest road conditions.

K2 ELITE 125MM/85A
SINGLE PACK

K2 ELITE 120MM/85A
SINGLE PACK

K2 ELITE 110MM/85A
4-PACK

URBAN FORMULA

Our urban wheel formula is geared towards those skaters looking for a full profile wheel for aggressive or urban commuting. It uses a slightly harder durometer at 90A that makes them more durable without taking away from their ride quality.

CLOSURE TECHNOLOGY

Traditional Lacing

Customize your lacing and knot the same way you tie your shoes.

Speed Lacing System

Secure your skates with one pull. The K2 Speed Lacing System makes it easy to get in and out of your skates. Just one pull of the lace, roll, and stow and you're ready to skate – it's that easy.

Boa® Closure System

By designing K2 Skate's upper and cuff around the Boa® Closure System, K2 has created the most comfortable and high performance fit available.

The Boa® Closure System gives skaters the ability to fine-tune their fit while skating. This eliminates pulling over to the side of the trail to tighten your skate laces, allowing you to keep cruising.

The Boa® Closure System also allows for skaters of any age to get in and out of their skates in seconds. How convenient!

CUFF TECHNOLOGY

Jr. Boa® Cuff

K2 and Boa® worked together to create this seamless integration of a youth skate with the Boa® System. This cuff offers the maximum amount of support that kids need and provides the "easy-on, easy-off" properties that make the Boa® System a must have on youth product.

Aggressive Cuff

Aggressive skaters need more support than most skater types. The development process for the K2 Aggressive cuffs involved huge gaps, slides and plenty of topside and boot tricks. This durable cuff is as good as it gets when you are out to destroy.

Stability Plus Cuff

This cuff sets the standard for recreational and fitness skating cuffs. The Stability Plus Cuff is the perfect blend of support where you need it, eliminating overall skate weight and offering versatility for a wide range of skaters.

VO2 Cuff

Designing cuffs for big-wheeled X-Training skates can be a challenge. You need to account for the higher wheel height, which means more support with no extra weight. The VO2 cuff creates the best of both worlds: extra support and lightweight design.

MOD 110 Cuff

By using stiffer material inserts on the side of the cuff we are able to provide more support and stability, while still making the cuff flexible enough to conform to your ankle for a comfortable fit.

MOD 125 Cuff

The MOD 125 cuff uses carbon fiber reinforcements for increased torsional stiffness and lateral support. The use of carbon fiber also provides the perfect strength-to-weight ratio, keeping it light and durable.

FRAME TECHNOLOGY

Aggressive Frame

Aggressive frames are designed to grind and take a beating, which is why K2 uses the fast-sliding, extra thick composite materials. The K2 Aggressive frame features our innovative hex frame spacers; making it easy to customize your wheel configuration from rockered to flat in no time, while also being fully UFS compatible.

F.B.I. Frame

The Frame Base Interlocking (F.B.I.) system creates a composite recreational frame that absorbs more road vibration than any other K2 frame. The F.B.I. is great for new skaters and those skating on rough terrain.

D.C. Aluminum Frame

Die Cast (D.C.) Aluminum frames are known for providing excellent power transfer and stability at any speed. The K2 D.C. Aluminum design delivers both properties in a medium-length, highly-maneuverable, fitness-oriented frame.

VO2.2 Frame

The VO2.2 frame is a light, versatile Aluminum X-Training frame. This maneuverable frame has enough length and stiffness to provide stability at the highest speeds and offers a power transfer formerly found only in training skates.

MOD 125 Frame

The MOD 125 frame is an all new development in the K2 Training segment that's built on a 125-120-125 mm three wheel configuration. By utilizing the rockered wheel set up we are able to ultimately create a lower stance height despite the big wheels. By using the bigger wheels, there is better rolling momentum and more stability over rough roads that might be encountered in a skate marathon. Lastly, we chose 7000 series extruded aluminum for extra strength, without sacrificing weight.
